

# Rise Above Vertical Vessel Maintenance

The Advantages of an  
EZ Lift Suspended Platform over Scaffolding

## Decreased Set-Up Time

Initial setup takes 8 hours with subsequent setup times down to 2 hours unlike scaffolding, which takes multiple shifts every time.

## Lightweight Material

6061-T6 aluminum is lighter than steel and just as strong.

## Increased Safety

Raise and lower the platform manually or on electric hoists for easy personnel and equipment retrieval.

## 360-degree Access

360-degree access to the vessel surface for demolition and rebricking.

## Modular Assembly

Pin-together assembly is easy with fewer parts and simpler setup than scaffolding.

## Work Area Spans Vessel

More workspace than scaffolding with less risk of falls or dropped material.
